Managing your References in L^AT_EX

Meirian Lovelace-Tozer

@MeirianLT @ResCom_unimelb 

<https://meirian.gitbook.io/latex>

Learning objectives

- Introductions;
- Video: Key to Referencing;
- Kahoot quiz;
- Demo: Overleaf, Google Scholar, Zotero;
- Your turn.

Animals

An article about animals.

Introductions

- Introduce yourselves.
- Answer the question: if you were a tree, what sort of tree would you be?
- Select one member of your team to create an Overleaf document and share this with the group by pasting the edit link in the Zoom chat.
- Choose a team name and set this as the `\author{\square}` on Overleaf.

Video: The Key to Referencing in \LaTeX

Kahoot quiz

How much do you remember?

`www.kahoot.it`

`www.overleaf.com`

Challenge

- Find an article about your chosen tree on Google Scholar.
- Add a bibliography item of the article you found to a BibT_EX file (.bib) in your shared Overleaf document.
- One member of your team should add the references to your main.tex file using the plain bibliographystyle.
- Each member of your team should add one sentence explaining which tree they selected, and include an in-text citation using the `\cite{□}` command.
